

```
public void dfs(Vertex u) {  
    u.visit();  
    u.visited = true;  
    for (each vertex v such that (u, v) is an edge in E) {  
        if (!v.visited) {  
            dfs(v);  
        }  
    }  
}
```
